## THE AG EFFECT: JOBS

Joe's corn and soybeans get fed to Dave's pigs. Dave's pigs get taken to Brian at the bacon processing facility via Randy's Trucking Service. The bacon gets delivered to Jane at the local grocery where Sharon the banker and Mr. Mitchell, the teacher, pick up that bacon for breakfast on Sunday mornings. At every step, revenues, taxes and jobs are added to the local community and the state — we call this the Ag Effect.

## Cost of Community Services<sup>2</sup>

Cost of Community Services (COCS) studies compare local government service costs to the revenues collected to pay for those costs in the residential, business and agricultural sectors.

### Average COCS for region

<b>0.258</b>	<b>AGRICULTURE<sup>##</sup></b>
<b>1.148</b>	<b>RESIDENTIAL<sup>§</sup></b>
<b>0.531</b>	<b>BUSINESS<sup>§§</sup></b>

Ratio less than 1,  
costs < revenue.

Ratio more than 1,  
costs > revenue.

Agriculture has an overall positive impact on Indiana communities, as it pays significantly more in revenues than the costs it imposes or the services it receives. In fact, communities keep more than 70 cents of every dollar of tax revenue contributed by agriculture.
